

ASB

AUTOMATED SOLUTION FOR BOX ASSEMBLY

Discover our robotic box erector solution, ASB! Easy to install, compact and quick to configure, ASB is a simple solution for automating a repetitive packaging task.

From a flatbed magazine, ASB extracts and forms a box using a mechanical system designed by Alliance Solutions. The machine places the box thus formed on the next process equipment according to the customer's needs.

A SIMPLE AND PROFITABLE SOLUTION!

ASB FOR BOX ASSEMBLY: A SOLUTION THAT IS...

COMPACT

ASB is more compact than traditional automated machines, making it easier to fit into tight factory or warehouse spaces.

COLLABORATIVE

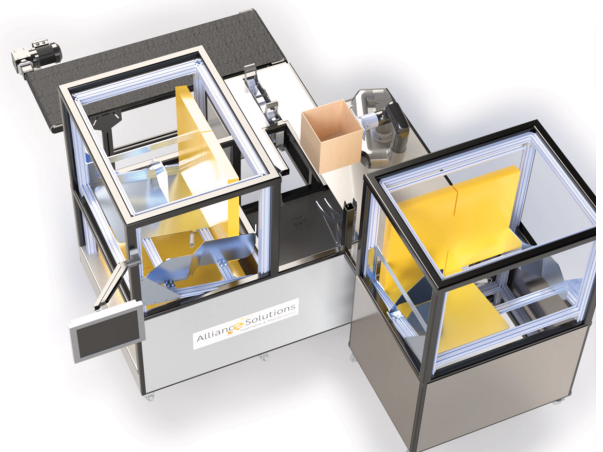

Featuring a robot operating in collaborative mode, ASB can be used safely alongside employees, without the need for additional safety barriers, reducing the risk of workplace accidents.

FLEXIBLE

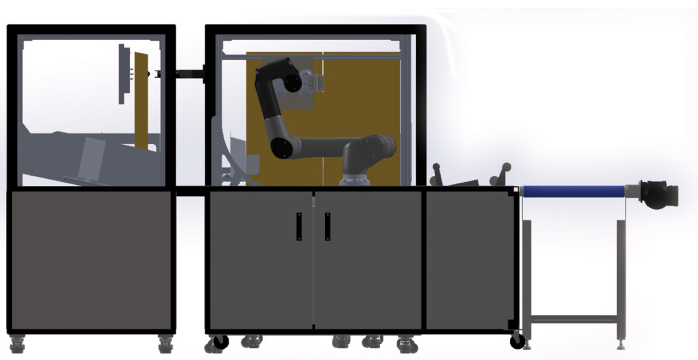

With its movable box magazine(s), ASB is more flexible than traditional automated machines, as it can be easily reprogrammed to accommodate new box formats without requiring significant hardware modifications.

SIMPLE TO CONFIGURE

Accessible remotely, the friendly user interface allows intuitive programming, even for non-specialized operators. Likewise, remote technical support is available from our team as needed.

ASB FOR BOX ASSEMBLY: A SOLUTION THAT IS ALSO...

⚙️ COST SAVING

ASB can be installed quickly and inexpensively compared to traditional automated machines since it does not need complex safety barriers.

Permet des changements de formats de boîtes rapides sans ajustements complexes. Exige peu de maintenance, tant au niveau main d'œuvre que pièces, économisant ainsi temps et argent!

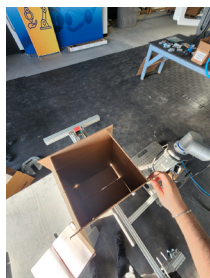

⚙️ ADAPTABLE

ASB can be easily redeployed to perform different tasks or moved to other production areas based on changing business needs.

⚙️ AUTOMATIC

Allows rapid box format changes without complex adjustments. Requires little maintenance, both in terms of labor and parts, saving time and money!

ASB IS A HIGHLY CUSTOMIZABLE SOLUTION ADAPTED TO YOUR SPECIFIC NEEDS FOR BOX ASSEMBLY!
